CUSTOM

Offering premanufactured rebar to meet your unique job specifications and requirements.

CAISSONS

Large and small diameter rebar caissons are available with spiral or ring bar requirements.

and highly skilled people who care about making **your project a success.**

Anchor Rebar Supply

Our quality reinforcing bar is cut, bent & preassembled to your exact specifications to save you time and money.

Anchor Rebar Supply Inc. is strategically located in Kingston, Ontario, between Toronto and Ottawa making us close to major Ontario construction markets. We carry a variety of stock rebar sizes and types including plain, epoxy and galvanized steel as well as an assortment of wire mesh sizes. Our manufacturing facilities include state of the art machinery that allow us to cut and bend rebar to your exact requirements while meeting industry standards. Once the rebar is cut and bent our dedicated staff prefabricate it into cages, caissons and mats for a variety of uses including bridge support columns, beams, light pole bases and box cages. We are members of the Reinforcing Steel Institute of Ontario (RSIO) and can fabricate to Ontario Provincial Standard Drawings (OPSD) while meeting Canada Standards Association (CSA) guidelines.

Need a custom solution? Our experienced onsite engineering staff will help turn your plan into product. We offer design consultation, estimating, and detailing.

Anchor Rebar offers shipping services for convenient delivery to your site in Ontario. Outside the province of Ontario? Speak with us to discuss special arrangements for delivery to your region.
